DHS: Active Shooter Pocket Card

An Active Shooter is an individual actively engaged in killing or attempting to kill people in a confined and populated area; in most cases, active shooters use firearms(s) and there is no pattern or method to their selection of victims. Active shooter situations are unpredictable and evolve quickly. Typically, the immediate deployment of law enforcement is required to stop the shooting and mitigate harm to victims. Because active shooter situations are often over within 10 to 15 minutes, before law enforcement arrives on the scene, individuals must be prepared both mentally and physically to deal with an active shooter situation.

FB-ISAO - Cyber Road Show

FB-ISAO will lead the development and conduct of a series of cybersecurity-focused discussion-based exercises (seminars). These exercises are anticipated to begin around September 2021 and to be conducted within the United States, in-person and/or virtually, and to be up to four-hours each. Exercise participants are expected to include individuals with some level of network or cybersecurity responsibility at their Faith-Based Organization, FB-ISAO, as well as other public and private sector partners and subject matter experts, as may be appropriate.
